About volunteering at UW Health

Volunteering at UW Health

We ask that you agree to a six-month time commitment. College students are asked to time their volunteering with the start of a school quarter. UW Health volunteers are required to be at least 16 years old and all volunteers need to follow regulatory requirements including annual trainings and maintaining up to date vaccinations.

How do I become a volunteer?

In an ongoing effort to proceed with an abundance of caution and a steadfast commitment to patient safety, we are not accepting new volunteers at this time. Please check back for updated information, or feel free to **call us at 608-555-1212** email questions to volunteer.services@uwhealth.org.

Volunteering opportunities

Volunteers play an important role across UW Health.

While there are **dozens** **a number of** volunteer positions within the organization, not all positions are available at this time. Some positions are only open to adults. Positions marked with an * are appropriate for 16 years old or older if openings are available.

The remaining content is correct we anticipate no additional changes

*** (in this case rather than submitting just the areas in green we would recommend highlighting the entire passage.

Third Floor Surgery Playroom

Work with Child Life to create a safe environment for children and visitors **in the third floor playroom.**
Support age-appropriate activities to children pre- and post-operative care. **Clean toys straighten playroom**
and organize Child Life supplies.
